THE S.S. CHANGSHA ACCIDENT

Suspension of the Third Engineer's Certificate.

James Edward Runcie, chief engineer, and Walter Douglas Cullen-Ward, third engineer, of the steamer Changsha, werd on August 18th, called upon before His Honour Judge Backhouse, with two engineer assessors, Messrs Berry and Cromack, in the Marine Court at Sydney, to show cause why their certificates should not be encelled or suspended.

An accident occurred on board the steamer on July 13, on the voyage from Hongkong to Melbourne, as a result of which one of the boilers was seriously damaged. At the inquiry on August 15th the Court found that the ensualty was caused by the wrongful act of the chief engineer by putting too much water in the boiler in the first instance, and by his default, when he was called, in not trying | the to ascertain more accurately before he left what was the cause of the trouble, and by the wrongful act of the third engineer in. allowing the clow-off cock to remain open too long.

The Court directed that the certificate of the third engineer, Walter Douglas Cellen-Ward, be suspended for three months from July 13, but added that it did not feel justified in dealing with the chief ongineer's certificate.

In giving the decision His Honour remarked that the Court considered the chief engineer would have acted more wisely if he had not put so much water in the boiler, The Ten Republics (S. America), by and if he had remained in the engine-room when called, and seen that the cause of the The Land of Veiled Woman, by trouble had been removed before leaving. They were not, however, the direct causes of the accident, and the Court therefore did. Among the Tribes in South West not feel justified in dealing with the chief's certificate. The third engineer's neglect was much greater. It would have been his proper course to try the "double shut-off" test, and then if not satisfied to inform his superior officers. The Court was of opinion that if a little more care had been shown by Mr Ward the accident would not have

His Honour remarked that Mr Ward's character in the past had been an excellent une. Sydney Evening News.

Access to Lock Lonond.

We have one interesting local question, however with which to occupy our spare atention. The Scottish Courts have discover ed that a certain boat-hirer on the bonny, conny banks of Loch Loniond has no right to anchor his craft in "the alveus of the Leven, '-a river which has been recognised as navigable for more than a century. And the decision will probably affect the access which the public has enjoyed to the famous loch. It is a railway company which is trying to restrict the navigation for its own; sensit, the Leven is the key to Loch omond, -and as a consequence we are having a big agitation which will probably develop into that greatest joy known to a Scotsman, "a gudo gangin" plea.

THE KING IN THE HIGHLANDS.

On Saturday, the King took leave of The Mackintosh and Mrs Mackintosh at Moy Hall, and motored forty miles to Tulchan Lodge, Speyside, Morayshire, where he is now the guest of Mr and Mrs Arthur Sassoon. MACAO GOSSIP

From Our Own Correspondent.) Macao, September 20.

Public Lightivo. Speculation has been conflictingly active since Sunday, not over the deadly encoze of our electric light plant or its short-lived rov git last night, but at the sudden ap pearance of acetylene globes on the main th roughfares and petroleum lamps on the lesser ones during the last three evenings From what I have been able to gather it would appear that after having plagued the g neral public for the last five years or so, this sorry concern has at long last come into its just descrist. The Manager, I am told, has been allowed a time-limit by the

this long-standing grievance. THE RICE QUESTION. "

A hungry belly may have no ears, but it has wits. The price of rice continues on the up-grade. Egged on by the cravof the late E. Jones Hugues, to sell by ings of the inner man, a crowd rickshiw coolies raided certain rice shops yesterday afternoon and helped themselves each to a provision for the next few days. The dealers effected several arrests which recalls another age-worn expedient exercised a day or two ago. Three out of a half dezen plotters entered a shop and started haggling over the "excessive" price asked for a bag of rice. Muscular action followed words and during the mêlée the - utside parties privy to the dodge drew up and coolly walked away with the bay !-

The Governor for the progress of our budding Rifle Association I unwittingly overlooked mention of a tangible evidence of same. Uniforms are being suppl gratis to the less well-to-do among the members, presumably on his own hook.

AN EXPLANATION.

Amitem of news has quite escaped me. No little curiosity was aroused in local SKIN & BLOOD olicial circles here by a reprint from Shanghai papers published in your columns some days ago; which gave it out that Sr.: O'Connor Martins, "the newly "appointed Commissioner for the delimitation of the the Blood and Bones. boundaries of Macao" had arrived at Shanghai.. Nobody in Macao was aware the matter was being dealt with in Lisbon 578 In due course it will probably be referred to Peking. Sr. O'Connor Martine is the' Briderode, applied for and.

Charge d'Affaires in Rome and was on his wiy to Japan on a round-the-world trip w an the Portuguese Minister in Peking, promptly) granted six months' leave absunce. Sr. Martins was offered interim charge at Peking and accepted it. THE HARDOUR OFFICE.

The Harbour Master, Capt. Xarier, leaves Macao on 20th inst. and is relieved by L . Ribeiro (ex.A.D.C.) Assistant Harbour Master.

DANGER OF BLOOD POISONING. TAVERY family should at all times be provided with a good reliable tiniment and those who have used Chamberlain's Pain Balm will admit that there is none hotter. Even as slight an injury as the cratch of a pin has resulted in blood poisoning and caused the loss of a limb. Sucli injuries are of no consequence when Pain Balm 'id promptly applied. Cuta, bruises and spinites and curvil in one-third less time when it is used and all danger of blood poisoning is avoided as it is antiseptic. For rale by all Chemistr and Storekeeners.

RUBBER PRICES. Further Declines Improbable.

We must not be taken as even hinting at an immediate revival in plantation rubber share prices or the immediate coming of a period of activity in the Rubber Share Market. All we wish to impress upon our readers, says the London Financier, is that the chances are certainly against any further substantial declines in share values, and that at moderate advances on the present prices the great majority of the best shares would be still very cheap as solid investment purchases. It is unecessary at this time of day to give al long string of statistics to prove the truth of the latter part of the statement we here just made. Any, reader can take the current prices of such shares as Anglo-Malays, Batu Caves, Bukit Rajahs, Cicolys, Highlands and Lowlands, Linggis, Patalings and Vallambrosus, and, working out the probable profits for this your on 4s per Ib net rubber, calculate with the help of the output figures to date, what the minimum profits of these companies are likely to be. He will be ignoring all advantages accruing from forward sales of rubber and the possibility of substantial increases in the outputs during the latter months of the current year." In some instances he will have what are universally admitted to be exceedingly conservative interim dividend declarations to guide him, and if he fails to arrive at the conclusion that these shares, and many others it is unnecessary to mention in detail; are not cheap investment purchases at prices considerably above those which

are ruling at the present time, then he had better leave plantation rubber alone and find come other outlet for his capital What we have said of purely rubber plantation companies is in a large measure Camara of two months to bring his ap- equally applicable to Caylon tea-cum-rubber paratus up to the stipulated working ventures, and also to companies having standard. Failing this the agreement will interests in such products as sugar. These be annulled. "I need hardly say that the companies, on account of their tea inter-Colony and its weekly visitors can hardly ests, are on what many would describe, afford to be prodigal of fellow-feeling for though erroneously if the expresion were laxly used, as a sounder investment basis than even the best of the Ma layan rubber ventures. They have arrived, in point of fact, at the position really sound plantation rubber companies must in time achieve, and there is accordingly less opportunity for local appreciation in their case than is bound to take place in connection with the rubber companies shares. But dear as some of these shares the police are now attending to. This appear to be, there is a practical certainty that for some years to come the dividend-

they will be able to pay will make purchases of them profitable enough from the standpoint of the investor who must have an immediate return upon his money, and who understands that security as to capital inevitably carries with it a small actual yield than ought to be the case where risks are being accepted.

LIFE WITHOUT HEALTH IS LIVING DEATH. VETARZOBRAIN AND NERVE FOOD

This remarkable compound, the latest discovery of modern times, is without equal in all cases of defective nerve and brain power, whether induced by worry, overwork, dissipation, or other influences. Sleeplessness, palpitation, defective circulation, nervous dyspepsia, tic or neuralgia, low spirits, mental and bodily prostration, want of confidence, general debility, premature decay or deficiency of the vital forces, loss of vitality, harassing dreams, restlessness that can settle to nothing, irritability of temper, female complaints, hysteria, backache, bearing down sensations, wasting diseases, consumption, night sweats, muddy, high-coloured water, one, are all so many different phases of brain and nerve wreckage and exhaustion, the cause of by far the greater portion of the misery, ill-health, and despondency by which we are confronted on every hand, that can only be successfully combated by the use of this wonderful and highly scientific preparation. Bracing up the system generally, it gives tone to the exhausted nerves, arrests all weakening wasting discharges, restores the falling energies, and imparis new life and vigour to those who had so recently seemed played out, used up and valueless. Bottles Price 2s. Sd.

WITHOUT PURE BLOOD HEALTH IS IMPOSSIBLE.

Mosconer is it imbibed into the system than it permeates and penetrates to the minutest capillaries, overcoming and expelling disease, wheresoever and in whatsoever form met with; removing all blotches, pimples, scurf, scurry, scrolulous and glandular swellings, discolorations, roughness and unalghily patches, for. Its effects are aimpet magical in the treatment of gout, rheunalism, sclatics, lumbago, pains and swellings of the joints, discharges, blood poison, ecsema, lepra, paoritais, bad legs, bad breasts, abscesses, picers, wounds, sores, goltre or Derbyshire neck, it improves the general health, and quickly removes long-standing broachitis, as thms, and hacking, straining, apasinodic cough, too often the precursor of consumption, Bidtles Price 2s. 3d.

AIR CRUISERS. 2,000 Can be Built at Cost

of Battleship.

The use of aeroplanes in the recent German and French military maneuvres. and their remarkable success, gives additional interest to an interview with the distinguished British aviator, Mr Claude Grahame-White, given to a correspondent of The New York Times just before he sailed for America to take part in the Boston Aviation Meet.

"My chief interest for the moment," added Mr Grahame-White, "" is in the development of a flying machine for purposes of war. I have just returned from a visit to the flying schools of France. A the forthcoming French managures more than thirty aeroplanes, representing al the world's best types, will be engaged in reconneitring work or regular trials. .

AIR CRUISERS FOR WAR.

" Air 'cruisers' are now being built and used in France for the purposes of war. These machines, which are combinations of the biplane and monoplane, carry a crew of three men, sitting just behind the motor.

"In the long boat-shaped body of the machine is the engineer. His sole duty is North Chinas have improved to Tls. 1621 to attend to running the engine. Next, with plenty of room for his maps and compass, is the 'observer,' He is a military officer who has specialized in serial reconnoitring. "Then comes the pilot of the eroplane, who manipulates the levers and controls its flight.

"It will not be long before France will have a fleet of 100 war aeroplanes. Germany, too, is secretly busy with the construction of a large air fleet; but it is now clear that aeroplanes will not be used in warfare in twenties, fifties, or hundreds. They will be built and flown in thousands. They are extremely cheap when compared with any other weapon. They can be quickly built.

"When reconnoitring is done in actual warfare, fifty or even a hundred machines may be sent out at one time to scour large tract of country.

"Their vulnerability to artillery fire from below enters into the question, of course, so far the tests which have been made have not been conclusive. Personally, I believe that although one or two of the squadron

of reconnuitring machines may be struck, a sufficient number will always return to provide the Commander-in-Chief which complete information of the enemy's movements.

TO CARRY EXPLOSIVES.

""Other things being equal, there is now no reason to doubt that the country which has the most efficient air fleet will win in the next great war.

"Although at present aeroplanes are being tested chiefly for their sconting and dispatch-carrying work, military experts in both France and Germany are studying seriously the destructive possibilities and weight-carrying capacities of war acroplanes. Already a machine can be built to carry a pilot and engineer, with an appreciable load of explosives, and my thus laden for several hours.

"Inconding bombs, "it is execulated by expert who have studied this particular question, will prove a most deadly form of aeropiane attack. Falling, say, upon fortifications or supply stores, they will start fires in a dozen places. A mechanism has already been devised to deliver a stream of such bombs from a chamber fixed beneath the aeroplane and operated by the pilot from his seat.

"Considerable skill is needed to drop a bomb accurately from any great height, but in the aerial attacks of the future a equadron of machines will pass to and fro over the spot to be bombarded, and each will-release a series of bombs .- Thus, although there will be an inevitable percentage of misses, a great many missiles will be sure to reach the mark,

CAN ATTACK FORTIFICATIONS.

stores harassing troops on the march, and night attacks upon troops in bivouse will be among the offensive uses of the aeroplane in war time. But, with the wonderful improvements which are being made machines, the destructive possibilities of the seroplane are almost unlimited.

"Special weight lifting machines could be built to-day capable of flying from foreign soil, hovering over London, drapping tons of explosives on the city, and returning to their starting place without, descending.

"There is no excuse now for any nation to belittle the potentialities of the acroplane in war. Proofs without number have been given of the growing reliability of machines. The scroplane engine is now as reliable as that in the motor car. Winds of thirty or thirty-live miles an hour may beflown and landings on quite rough ground may be made, and—this point above all others must be remembered—for the price of one of the largest battleships a nation can provide itself with a fleet of some 2,000 seroplanes."

It has been decided by the committee of the Royal Aero Club not to sanction the proposed aviation race between Shoreham and Dieppe, as they consider that a flight of nearly 80 miles over the sea entails unnecessary danger.

The history of any race in its sex composition would show us that such oscillations have occurred throughout time, modified, no doubt, in their regular sequence by such factors as ars and famine. GREAT PORTUGUESE

As is well-known, the recent unrest in South China has led many of the more wealthy Chinese to come to Hongkong and lately there has been somewhat of a "boom" in house property in the Colony, thus ousting many families who have had considerable difficulty in finding fresh quarters in which to reside. In this connection it is understood that the matter carnest consideration of His Excellency the Governor, and a housing scheme on gather a large-scale, more particularly for the Portuguese section of the community is under consideration. In a large measure the Portuguese are the people who have been most affected by the boom and that being the chee it is suggested that they place because they are to all intents and purposes British subjects by birth and comparatively few, if any, ever migrate

THE KINSHAN COLLISION.

The collision between the s.s. Kinshan and the Chinese gunboat Pos Pak is being commented on by the native Press. It is stated that the gunboat was returning to Canton from a tour, during which some official had been examining the condition of several forts, and when nearing Canton. she and he Kinshan collided. It is contended, with what degree of truth we cannot say, that the gunboat blow hor whistle and that everything was done that could be done, but she ran into the stern of the Kinshan, There is a statement that the Kinshan only blew her whistle once, and did not stop her engines. But whoever was to blame, the bows and outlook of the Chinese gunboat were badly damaged and immediately, the official on board made out his report and forwarded it to the Viceroy, making a demand for an indomity from the owners of the steamer. The demand, indeed, was very curt. / ii On the other hand, another report was sont in to the British Consul General, and he courtenusly sent in a request to the Vicercy that the matter my be at once examined late, and asked that an accomplished official be appointed to the work. It was greed that the matter be taken in hand at once, and as quickly decided.

THE CANADIAN ELECTIONS.

CONSERVATIVES' SWEEPING VICTORY.

RECIPROCITY DOOMED.

(Reuter's Service to the China Mail.) London, Sept. 22. The Canadian elections took place yesterday and the returns at 9 p.m.

indicate that the Government will be defeated and Reciprocity rejected: The Conservatives then had a net gain of 29.

MINISTERS DEPEATED.

The Hon. W. S. Fielding, Minister Finance; Hon. W. Paterson, Minister of Customs; Hon. G. P. Graham, Canada, the journal says, needs our Minister of Railways and Canals; Hon. Sydney Fisher, Minister of Agriculture; Hon Sir F. W. Borden, K.C.M.G., Minister of Militia and Defence; Hon. W. L. Mackenzie King, C.M.G., Minister of Labour, have all been defeated.

The Opposition leader Mr. Borden, has been elected.

There are 13 more results to come in The Hon. W. Templeman, Minister of Inland Revenue and Mines, was also defeated."

The early returns indicated that the Government would have a bare majority, and the actual landslide was not expected.

The Opposition made heavy gains in. the maritime provinces and in Ontario. They won six scats in Quebec, Sir Wilfred Laurier's stronghold.

The Hon. Mr Fielding and the Hon. where have ended-Mr Paterson, both of whom were defeated, were the Ministers who negotiated Reciprocity.

PRESIDENT TAFT DISAPPOINTED.

At Kalamazoo President Taft received the el ction returns at a banquet, but refused to say more than, "I am greatly disappointed."

THE FINAL RESULT.

gained a majority of 45, the largest Amalgamated Society to discuss secured by any party since 1878. Eight Ministers have been defeated.

PRESIDENT TAFT'S VIEWS.

LOSTON, Sept. 22. President Taft in a speech at-Battlecreek yesterday afternoon reits rated his

opinion that Reciprocity was simply a trade pact by which annexation was not even a remote possibility. He favoured the abolition of Custom houses on the frontier, absolute free trade with the Dominion as a substitute.

President Taft was at Kulamazoo when he heard of the defeat of Reciprocity. Speaking at a banquet he said he was greatly disappointed by the news. "I had hoped" he said, "that the messure would pass and proxe the correctness of my judgment that it is a wood thing for both countries. It takes two to make a bargain, and if Canada declines we can still go on doing business at the old stand."

The completeness of the victory of the Conservatives has come as a general

The Liberals have lost over 40 soats. The Conservatives carry the whole of Winnipeg.

A NATIONAL VICTORY.

Mr Border, the successful leader of in the interests of public order and the late Opposition, in the course of an | well-being. interview, stated that the people had suswered those who desired to drive Reciprocity through Parliament by a temporary majority not possessing a mandate thereon. Canada was determined that there was to be no parting of the ways, but she would continue along the path of nationbood. She had emplayized the strength of her ties with

the Empire, but the verdict was given in no spirit of unfriendliness towards the United States. Mr Borden concluded that the triumph was that of the Canadian people rather than that of any political party. He gratefully acknowledged the support of those Liberals who had realised a supreme national issue above considerations of party.

AMERICAN REGRETS.

The American Press of all shades of opinion regrots the results.

The Republican Tribune thinks that the voters were governed, more by prejudice than reason.

The Democratic World says the time will come when intelligent Canadians will regard the election as one of the greatest disasters which has ever befallen the Dominion.

The Democratic Times declares that the election is the triumph of reaction and ignorance.

The Republican Herald remark that time will vindicate Sir Wilfrid Laurier. markets more than we do hers. BRITISH UNIONISTS

JUBILANT.

The defeat of Reciprocity is welcomed with the greatest enthusiasm by Imperialists in London. The Unionist evening newspapers

are jubilant. The Pall Mall Gazette, though joining in the chorus of joy, at the same time pays a tribute to Sir Wilfrid Laurier, remarking that he has rendered great service to Imperialism under circum-

stances of peculiar difficulty. The Westminster Guzette salutes the fallen leader and finds ground for consolation in the fact that Canadians have voted against Reciprocity in the belief that it would weaken Imperial tie. -

Tim long stretch of shool water acts as a deterrant to Hollow ever becoming a port, of consequence, and trade on this accoun is severely handicapped, especially, as the cargo boat service can pover be depended on for handling cargo.

RAMBLING NOTES.

With the end of September in wiew we're still waiting for a big drop in the temperature. The days have been hot snough during the past week, but thank goodness it's getting a bit more "nippy at nights... Those optimists who a fortnight ago donnod dark suits in the belief that the cold season had really set in have had to revert to cooler attire during the past few days. But it ought not to be long now ere they can once more don their tweeds. Then it will be good-bye to the delights of bathing picnics.

Anyhow the Colony is already beginning. to stir itself with a new life. Football togs are being examined in preparation for the coming season and already cricketers have been "getting their eye in". Tennis, too, can now be played in comfort; so there's something for everybody to turn their energies to. Happy Valley will soon again justify its title as "the playground of the Colony."

Those dear folk who believe in omens shrugged their shoulders and puckered their brows when the typhoon signals went up on a date so near the anniversary of the disastrous "blow" of 1906. They wer sure history was going to repeat itself, but once again they learned that it is dangerous to prophesy unless one knows-then it's easy to be wise. No, thank heavens we had nothing more serious than half a gale on the 18th, though as it was I heard that some Kowloonites were on the verge of seasickness in crossing the harbour at mid-

For the first time, the day typhoon signals have been hoisted from the mast head on Signal Hill. The change has been appreciated by practically all the residents of the peninsula, as well as by shipping people using Kowloon Bay. But why, it is asked, cannot the night signals be also exhibited from the same place? Where they are at present many residents cannot The City of Enticement, by Dorothea see them, nor can captains on board ships in Hunghom Bay. Perhaps the desired Master Christopher, by Mrs Henry de La change can be effected.

"A startling piece of news has been than that a boycott is being practised by, In Fancy's Mirror, by Violet A. Simpson, above all people, the representatives of The Indiscretions of a Lady's Maid, by law and order at the Central Police Station! But, most interesting of all, is the Canteen of all places. Testotallers and temperance advocates in Hongkong, -if there are any-will no doubt rejoice at the good news, for the boycott has been vigorously kept up for more than a week. From all reports everything is practically at a standstill in the Canteen Department with the exception of "an occasional call for a lemonade, averaging in number from one or two a day; "It is even said that one brave here went in and called for a cigar and a glass of iced water-and got it too! Another ! blue ribbonite" was seen gingerly entering the Canteen but, it was only to buy tinned provisions in fear of the approach of the threatened typhoon

The trou le arose, I am given to understand, through an order being issued to the effect that no-one might sign for a drink for anyone except himself, and as this was regarded as interfering with the liberty of the subject with a vengennce, the men rose up in arms against such a regulation. If a compromise is not speedily effected it is feared that the Canteen will have to close up altog ther. Where will our friends get their "neurishment" then?

A "dim religious light" now prevails in the Suprema Court. Evidently somebody has got exclusive and first hand information that the new Law Courts will not be ready for occupation for some considerable time; for the windows of the Court have taken unto themselves a green hue during the last week, thus shutting out the somewhat annoying sunlight which used to stream down on to the heads of the barristers, solicitors, reporters, and some times even the Judges themselves. But why this sudden inspiration at the commencement of the Vacation, the end of the Accounts to hand indicate that Hoihow summer, and, last but not least, after all these years? The thing is mystifying to a degree and seems to point to the probability that another Chinaman will have a long wait before he can come along and pick up a similar bargain to that secured by a compatriot in the case of the old Post Office. I often wender whether the Sanitary Board

My little pin-prick administered to a correspondent of your evening contemporry, Mr Editor, has made him wincen little. He evidently didn't like the suggestion that the adjective in the phrase . Ever yours, dear Telegraph" was a bit unfortunate. And honce he smites his chest and passionately declares "I have no hesitation in asserting that far from dear in any other sense than mine, the Telegraph is a good ton conts worth." Of course, everybody is ntitled to his own views. And, as it is, juite conceivable that there's room for a iversity of thought on the question under notice. I note that the correspondent's offusion is precord, by these significant words :- "The opinions expressed by our correspondents are not hocestarily those of the Hongkong, Telepruph." Quits 50.

A SIGHT WITH RUNNING ECZEMA

Eruption All Over His Head and Face. Itched Dreadfully. One - Cake of Cuticura Soap and

One Tin of Cuticura Ointment Cured Him In No Time.

his head and face with running eczema. He was a perfect sight with the cruption in great masses. It itched dreadfully, and I took him to the doctor. He was under the doctor's care for about two months, but it did not cure him at all. I also tried several other treatments but his suffering kept right on. When he was nearly four months old, I was persuaded to try Cuticurs Boap and Cuticurs Cintment. I had only one cake of Cuticurs Boap and one tin of Cuticurs Cintment and they cured him in no time. At present he is the picture in no time. At present he is the picture of health. What I have told you is the

honest truth. I had some of the Cuticura Cintment
I had some of the Cuticura Cintment
left, and my oldest son used it to cure
his chapped hands so I am sure I can
prove that Cuticura Cintment is a wonderful thing for both these purposes. I
told a friend in Yeovil about the cure; told a friend in Yeovil about the care. This friend was suffering with a skin trouble too, and was cured by Cuticura Remedies." (Signed) Mrs. Banfield, Free St. Ilchester, Som., Eng., May 21, 1910.

The speed and economy of the Cuticura treatment is shown by this letter, a single tablet of Cuticura Soap and box of Cuticura Ointment having been sufficient. Depots: London, 27.
